

FARMERS BRANCH
TEXAS

NDCWSD Assessment

City Council Meeting | December 16, 2025

Requested By: Public Works Department

Options or Process Slide

- The North Dallas County Water Supply Corporation is a Texas non-profit corporation established in 1991
- Established with the approval of both the City of Farmers Branch and the Town of Addison

- The purpose is to provide sewer services to both Cities
- Without this increase in services, further growth in Addison and on the east side of Farmers Branch would not have been possible

- The interceptor sewer system was completed in 1995
- The system requires inspection every 10 years per design engineer recommendations

- Freese and Nichol's scope is for a multi-sensor condition assessment
- Cities' responsibilities are based on calculated ultimate flows for the interceptor system
