Important things to note about this sample:

The price of the eligible products and services must be the most heavily weighted factor. This means that it must have the highest number of "Points Available." In this sample, the vendors could score up to 50 points for the price of eligible services factor (more than any other single factor).

The applicant rated the vendors on how well they met each factor. Then, they totaled the vendors' point values for all factors.

*This number must be higher than all other numbers in the same column.
