

Cybersecurity Contract

City Council Meeting | October 21, 2025

Requested By: Innovation and Technology Department

Cybersecurity Contract

Background

- 1** The City relies on multiple vendors for cybersecurity protection
- 2** Defense in Depth (DiD) applies multiple layers of protection
- 3** Current agreement expires in 2025 and needs to be renewed
- 4** Renewal needed to ensure protection, monitoring and quick response

Cybersecurity Contract

Why this is needed

Enhancing cybersecurity to ensure reliable services, protect sensitive information, and minimize financial and operational risks.

Protects City Services

Keep critical systems like utilities, public safety, and records safe from disruptions

Prevents Costly Attacks

Reduces the risk of ransomware or data breaches that could be expensive to fix

Safeguards Community Data

Protects sensitive resident and employee information from theft or misuse

Ensures Quick Recovery

Provides tools and support to restore systems faster if an incident occurs

Cybersecurity Contract

Cost and Implementation

Fixed Annual Cost

Annual payment not to exceed \$88,000 provides stable, consistent pricing

Total Contract Value

\$264,000 over three years, already budgeted for ongoing protection

Smooth Renewal Process

No major changes needed since it continues existing cybersecurity protections

Immediate Coverage

Protection remains active without interruption during the new contract period
