Lead and Copper Rule Revision Compliance Plan

Phase III

CITY OF FARMERS BRANCH | 4/29/2024

Lead Service Line Inventory

- All systems must develop an LSL inventory **by October 16, 2024**
- Include public and private service lines
- Identification of:
 - Non-lead service lines
 - Lead service lines
 - Galvanized requiring replacement lines
 - Lead status unknown lines – no longer allowed
- Updated annually or triennially
- Tabular version of inventory must be publicly available at City Hall or on City Website

TCEQ Service Line Inventory Requirements: Updated

TCEQ has released its official updated guidance for Texas based utilities to comply with EPA LCRR requirements

- All unknown service lines must be eliminated from LSL
- Confirmation that mains installed in 1989 or newer can be considered “Non-Lead” in absence of local lead ban information
- Replacement of Galvanized Requiring Replacement (GRR) lines to the customer building inlet must be performed by 2037

Phase III: Lead Service Line Inventory

**Project Management and
Coordination Meetings**

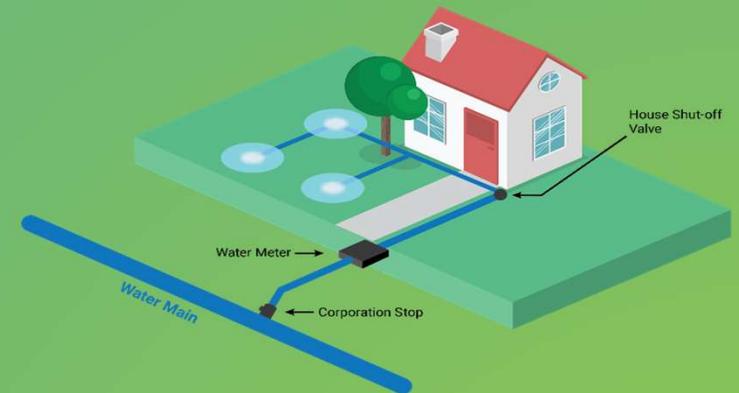

**Public Facing Inventory and
Communication Materials**

**Final Inventory Review and
Submittal**

Updated LSL Compliance Plan
